

## HIPAA Code Set Maintenance

### The Client

WebMethods offers comprehensive support for HIPAA transactions to meet organization’s IT and healthcare business processes requirements. Support for ANSI X12 EDI and all HIPAA transactions and code sets, including out-of-the-box validation to Level 5, and capability to meet Level 1-7 of WEDI SNIP structured certification process.

### The Challenge

The HIPAA Standard EDI format requires standardization of the data content by specifying uniform definitions of the data elements that will be exchanged in each type of electronic transaction and identification of the specific codes or values that are valid for each data element. These code values are provided by different organizations, vendors in different formats. Payer, provider clearing house systems requires these code values in a specific format to support their application specific requirement. These code lists are gets updated time to time.

### Scope of the Project

Softima collects these code list every quarterly and brings in to client-required format and supplies to client as a single update.

### Project Approach Project Team

- webMethods’ Team
- Softima’s Team

### The Solution

- Softima dedicated team gathers the information of code list updates time to time
- Maintains a data base of client required formats
- Converting the available formats in to client required formats
- Providing a single click solution to the client
